Grace International

Tender: Development of Centralized Access Control Integration System — B. BIRDS (Border Incident Reporting & Documentation System) - Phase II
e-GP tender tracking no.: 1347267
Date: 18/10/2026

COMPLIANCE STATEMENT

Technical Specifications for BIRDS (Border Incident Reporting & Documentation System) - Phase II

1. **Basis of Evaluation:** Demo/Documentation must be submitted. The submitted demo/Documentation must be qualified/accepted by the Technical Evaluation Committee (TEC) as per the Technical Specifications for the bidder to be considered responsive.

2. The tenderer will be considered Non-Qualified or Non-Responsive if the required technical documents and the application demo/Documentation are not submitted or accepted by the TSC.

3. Any clarification must be submitted to TSC within 3 days (72 hours) from the tender opening date and time. The acceptance test of the application will be conducted on a No Cost, No Obligation basis. All necessary test results, reports (if any), and relevant certificates must be submitted along with the offer.

4. The tenderer will be considered NON-QUALIFIED or NON-RESPONSIVE if any modifications are made in the Technical Specification column. The tenderer should indicate compliance by stating "Comply" or "Not Comply" as applicable.

5. The related services shall comply with following technical specifications:

Ser	Item Description	Technical Specification	Bidder's Response
1.	System Type	Enterprise-grade Border Incident Reporting & Documentation System (BIRDS) for centralized recording, management, verification, tracking, analysis and reporting of border-related incidents.	**Comply** *See Annex A, item 1*
2.	Deployment Architecture	Centralized web-based application with secure access through BGB's authorized network/intranet. The system shall support scalable 3-tier architecture comprising presentation, application and database layers.	**Comply** *See Annex A, item 2*
3.	User Management	Role-Based Access Control (RBAC) with configurable roles, privileges and access scopes. User access shall be assignable based on HQ, Sector, Battalion and other authorized organizational levels.	**Comply** *See Annex A, item 3*
4.	Authentication	Secure username/password authentication with configurable password policy. The system shall be capable of integration with Active Directory/LDAP or other centralized identity management systems.	**Comply** *See Annex A, item 4*
5.	Incident Registration	Authorized users shall be able to create, edit, review and submit incident reports through standardized electronic forms.	**Comply** *See Annex A, item 5*

Ser	Item Description	Technical Specification	Bidder's Response
6.	Incident Classification	Configurable incident categories, sub-categories, incident types, severity levels and status classifications.	**Comply** *See Annex A, item 6*
7.	Incident Details	The system shall capture incident date/time, location, border area, BOP/Unit, incident type, description, persons/entities involved, response/action taken, outcome and other relevant information.	**Comply** *See Annex A, item 7*
8.	Geographical Information	Support for GPS coordinates (latitude/longitude) and map-based incident visualization. The system shall allow authorized users to identify and view incidents geographically.	**Comply** *See Annex A, item 8*
9.	Border Sector Information	Incident records shall be linked to relevant Region/Sector/Battalion/BOP/area of responsibility through configurable organizational hierarchy.	**Comply** *See Annex A, item 9*
10.	Evidence & Document Management	Support attachment and storage of photographs, videos, scanned documents, PDFs, reports and other evidence files against individual incidents.	**Comply** *See Annex A, item 10*
11.	Media Metadata	The system should preserve available metadata of uploaded evidence, including file name, date/time and other relevant metadata where technically supported.	**Comply** *See Annex A, item 11*
12.	Incident Timeline	Each incident shall maintain a chronological history of reporting, verification, investigation, updates, actions and closure.	**Comply** *See Annex A, item 12*
13.	Workflow Management	Configurable workflow for Draft → Submitted → Reviewed → Verified/Approved → Closed, with authority-based actions at each stage.	**Comply** *See Annex A, item 13*
14.	Verification & Approval	Authorized supervisory officers shall be able to review, return, modify, verify, approve or reject incident reports.	**Comply** *See Annex A, item 14*
15.	Incident Tracking	Unique system-generated incident/reference number for every registered incident. Users shall be able to track incidents by reference number, status, location, date, category and responsible unit.	**Comply** *See Annex A, item 15*
16.	Search Facility	Advanced search and filtering by date range, location, unit, incident type, severity, status, reference number and other configurable parameters.	**Comply** *See Annex A, item 16*
17.	Dashboard	Role-based dashboard displaying incident statistics, pending reports, verified incidents, open/closed cases, trends and other operational indicators.	**Comply** *See Annex A, item 17*
18.	GIS/Map Dashboard	Map-based visualization of incidents with configurable markers, filters and incident categories.	**Comply** *See Annex A, item 18*

Address : House 5, Road 2, Block C, Banasree, Rampura, Dhaka 1219
Phone : 01755253505, 01730357123, 01701072702
E-mail : graceinternational98@gmail.com

Ser	Item Description	Technical Specification	Bidder's Response
19.	Analytics & Statistics	Generation of statistical and analytical reports based on incident type, location, time period, unit, frequency, severity and other parameters.	**Comply** *See Annex A, item 19*
20.	Trend Analysis	Support for graphical presentation of incident trends by day, week, month, quarter and year.	**Comply** *See Annex A, item 20*
21.	Reporting	Generation of configurable operational, statistical and management reports in printable and downloadable formats.	**Comply** *See Annex A, item 21*
22.	Export	Authorized users shall be able to export permitted reports/data in formats such as PDF, Excel/CSV.	**Comply** *See Annex A, item 22*
23.	Notifications	Configurable system notifications for new submissions, pending verification, returned reports, approvals, escalations and other workflow events.	**Comply** *See Annex A, item 23*
24.	Audit Trail	Comprehensive and tamper-evident audit logging of user login, creation, modification, approval, deletion, download and other significant system activities.	**Comply** *See Annex A, item 24*
25.	Data Integrity	The system shall maintain data consistency and shall prevent unauthorized alteration or deletion of finalized/approved incident records.	**Comply** *See Annex A, item 25*
26.	Data Security	Sensitive information shall be protected through appropriate access controls, secure application architecture and encryption mechanisms.	**Comply** *See Annex A, item 26*
27.	Encryption	Communication between client and server shall use HTTPS/TLS. Sensitive data shall be encrypted at rest where applicable.	**Comply** *See Annex A, item 27*
28.	Session Security	Configurable session timeout, secure session management, concurrent-session control and automatic logout after defined inactivity period.	**Comply** *See Annex A, item 28*
29.	Password Security	Configurable minimum password length, complexity, failed-login threshold, password expiry and account-lockout policy.	**Comply** *See Annex A, item 29*
30.	Database	Enterprise-grade relational database supporting transactional integrity, indexing, backup, recovery and scalable data storage.	**Comply** *See Annex A, item 30*
31.	API / Integration	Secure REST API and/or equivalent integration interface for interoperability with authorized BGB systems and future applications.	**Comply** *See Annex A, item 31*

Address : House 5, Road 2, Block C, Banasree, Rampura, Dhaka 1219
Phone : 01755253505, 01730357123, 01701072702
E-mail : graceinternational98@gmail.com

Ser	Item Description	Technical Specification	Bidder's Response
32.	AD/LDAP Integration	Capability to integrate with existing BGB Active Directory/LDAP infrastructure for centralized authentication and user management.	**Comply** *See Annex A, item 32*
33.	File Storage	Centralized and scalable storage mechanism for incident-related documents and multimedia evidence with configurable storage limits and retention policies.	**Comply** *See Annex A, item 33*
34.	Backup	Automated scheduled backup of application/database data and associated documents/evidence. Backup frequency shall be configurable.	**Comply** *See Annex A, item 34*
35.	Disaster Recovery	The system shall support deployment/replication at an authorized Disaster Recovery (DR) site and restoration of application and database services following system failure.	**Comply** *See Annex A, item 35*
36.	High Availability	Architecture shall support redundancy/high availability of critical application and database components where required by the deployment environment.	**Comply** *See Annex A, item 36*
37.	Scalability	The system shall be scalable to accommodate increasing numbers of users, incidents, attachments, organizational units and historical records without major architectural redesign.	**Comply** *See Annex A, item 37*
38.	Concurrent Users	The proposed system shall support a minimum of [100/250/500] concurrent users without degradation of core system functions.	**Comply** *See Annex A, item 38*
39.	Performance	Normal user transactions shall generally respond within 3 seconds under the specified concurrent-user and infrastructure load, excluding large file uploads/downloads and complex report generation.	**Comply** *See Annex A, item 39*
40.	Availability	The application shall support a minimum 99.5% service availability, excluding scheduled maintenance and force majeure events.	**Comply** *See Annex A, item 40*
41.	Mobile Responsiveness	Web interface shall be responsive and usable on authorized desktop, laptop and tablet devices.	**Comply** *See Annex A, item 41*
42.	Browser Support	Compatible with current supported versions of Google Chrome, Microsoft Edge and Mozilla Firefox.	**Comply** *See Annex A, item 42*
43.	Localization	Interface shall support English and shall be capable of supporting Bangla labels/content where required.	**Comply** *See Annex A, item 43*
44.	Data Retention	Configurable data-retention policy with controlled archival of historical incident records.	**Comply** *See Annex A, item 44*
45.	Data Archiving	Authorized administrators shall be able to archive historical records while retaining their audit trail and retrievability.	**Comply** *See Annex A, item 45*

Address : House 5, Road 2, Block C, Banasree, Rampura, Dhaka 1219
Phone : 01755253505, 01730357123, 01701072702
E-mail : graceinternational98@gmail.com

Ser	Item Description	Technical Specification	Bidder's Response
46.	Administrative Module	Central administration module for managing users, roles, organizational units, incident categories, workflows, system parameters and reference data.	**Comply** *See Annex A, item 46*
47.	Configuration	Incident types, categories, workflow stages, organizational hierarchy, notification rules and report parameters shall be configurable without modification of core application code wherever practicable.	**Comply** *See Annex A, item 47*
48.	Logging & Monitoring	Application, security and system logs shall be maintained with configurable retention and administrative monitoring facilities.	**Comply** *See Annex A, item 48*
49.	Security Hardening	Application shall follow recognized secure development practices and shall address common web application vulnerabilities including those identified in the OWASP Top 10.	**Comply** *See Annex A, item 49*
50.	Vulnerability Assessment	Supplier shall conduct application security testing/Vulnerability Assessment and provide a report before production deployment. Critical and high-risk vulnerabilities shall be remediated before acceptance.	**Comply** *See Annex A, item 50*
51.	Source Code / Ownership	All application components developed specifically for BGB shall be delivered as per tender/contract terms, including relevant source code, database schema, configuration and technical documentation where specified.	**Comply** *See Annex A, item 51*
52.	Documentation	Supplier shall provide System Administration Manual, User Manual, Installation/Deployment Guide, API Documentation, Database Documentation and Backup/Recovery Procedure.	**Comply** *See Annex A, item 52*
53.	Training	Vendor shall provide hands-on training for system administrators, designated operators and end users, including incident entry, verification, reporting and administration.	**Comply** *See Annex A, item 53*
54.	Warranty & Support	Minimum 01 (One) year warranty and technical support including bug fixing, security patches, configuration support and troubleshooting.	**Comply** *See Annex A, item 54*
55.	Customization	System shall allow reasonable customization of forms, reports, workflows, organizational hierarchy and incident classifications according to BGB operational requirements.	**Comply** *See Annex A, item 55*
56.	Deployment	Complete installation, configuration, integration, testing, data migration (if applicable), commissioning and production deployment shall be included in the scope of supply.	**Comply** *See Annex A, item 56*

Address : House 5, Road 2, Block C, Banasree, Rampura, Dhaka 1219
Phone : 01755253505, 01730357123, 01701072702
E-mail : graceinternational98@gmail.com

Ser	Item Description	Technical Specification	Bidder's Response
57.	Acceptance Testing	Final acceptance shall be based on successful completion of Functional Acceptance Test (UAT) against the approved requirements and test cases.	**Comply** *See Annex A, item 57*
58.	Future Expansion	The architecture shall allow future integration with GIS, mobile applications, surveillance systems, digital evidence systems and other authorized BGB information systems.	**Comply** *See Annex A, item 58*

Declaration

We confirm that the Item Description and Technical Specification columns above are reproduced from the tender document without modification, and that our offer complies with each item as stated in the Bidder's Response column. How each item is met, and where it can be verified in the application demo, is set out in Annex A (Compliance Notes). Additional features offered beyond the specification, included in the quoted price and not forming a condition of this offer, are listed in Annex B (Value Additions).
